

TEENAGE BOOSTER VACCINATIONS

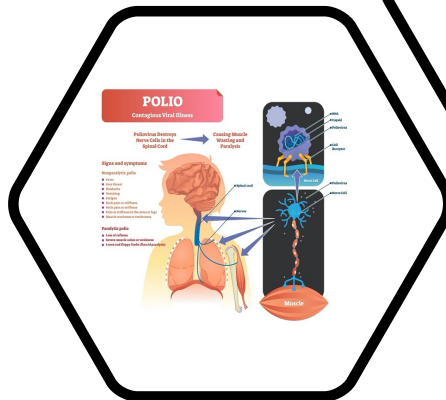

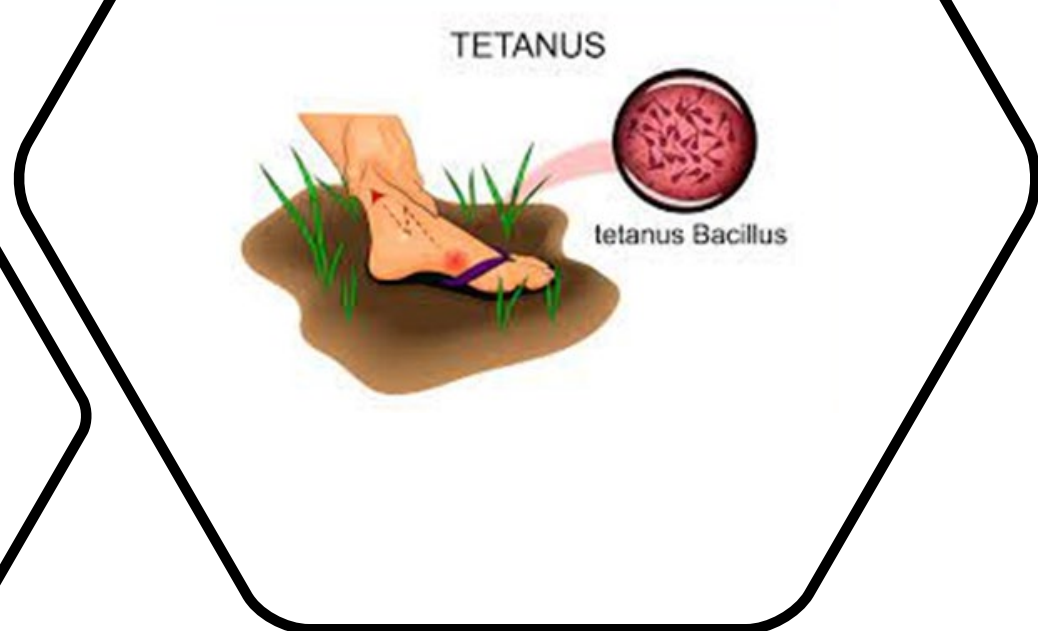

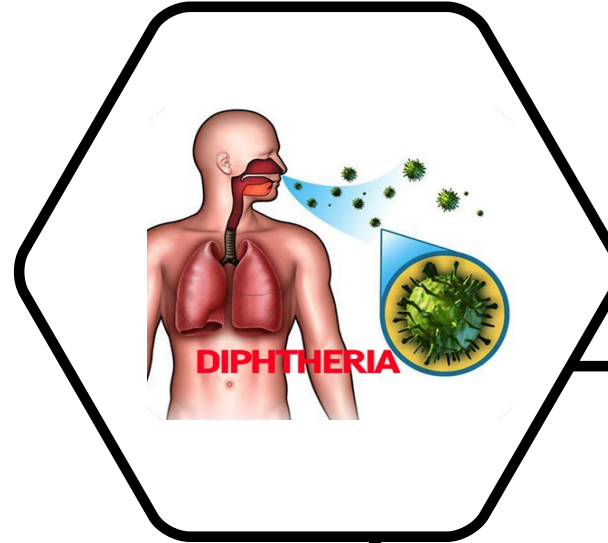

- Diphtheria, Tetanus, Polio
- Meningococcal ACWY
- (Measles, Mumps, Rubella)

What is Diphtheria, Tetanus & Polio?

- Diphtheria, Tetanus, Polio- 3 in 1:
- Diphtheria-A bacterial infection which can cause breathing problems and damage to the heart and nervous system.
- Tetanus- Bacteria found in the soil. Enters the body via a wound- painful disease affecting the nervous system causing muscle spasms, breathing problems and can kill.
- Polio- A virus that attacks the nervous system and can cause permanent paralysis of muscles.

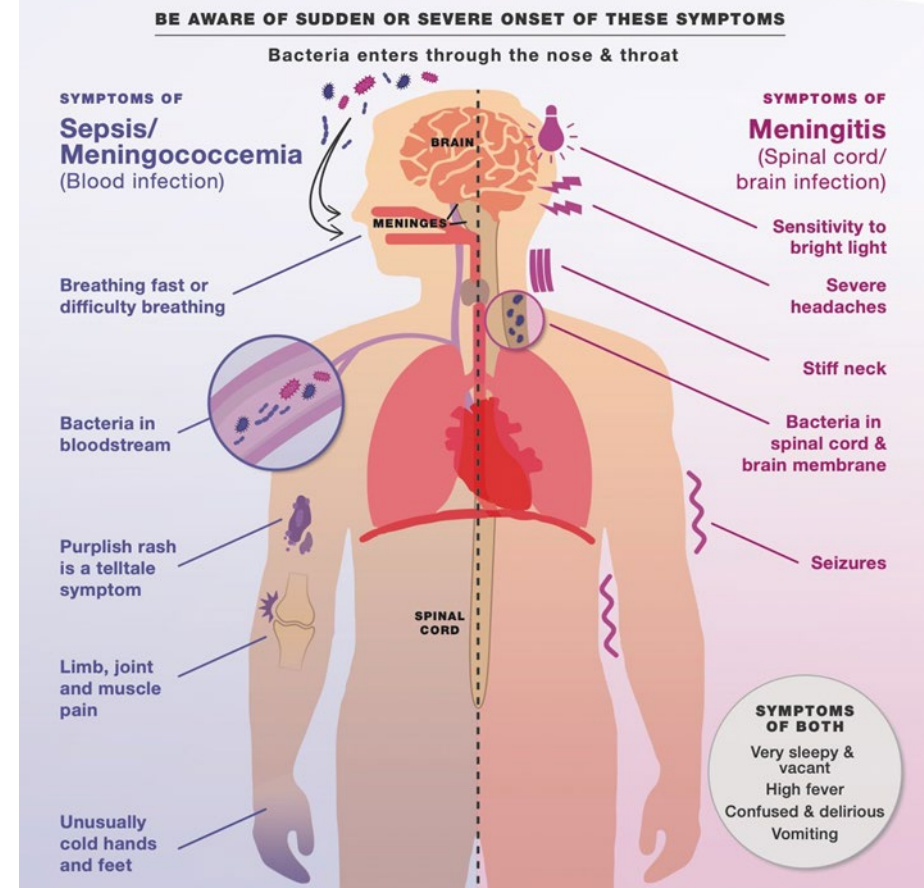

What is Meningitis ACWY?

- Meningococcal ACWY- 4 most common strains affecting young people.
- Meningococcal disease can cause Meningitis (swelling of the lining around the brain) and Septicemia (Blood poisoning).
- Can result in life changing disabilities, hearing loss, brain damage, amputation of limbs and at worst, death.

Meningococcal meningitis can kill in a matter of hours.

MENINGOCOCCAL BACTERIA CAN CAUSE SEPSIS OR MENINGITIS. BOTH ARE DEADLY.
